## ABOUT ME

I am a software developer student at University of Denver with years of experience in healthcare. Working in Healthcare has taught me valuable skills such as team work, critical thinking, attention to detail, and effective communication skills. Learning to code has always been an interest of mine, I enjoy creating new websites or using my skills to add to existing work. I am a fast learner and a hard-working student wanting to learn and practice more code!

## TECHNICAL SKILLS

HTML, CSS and JavaScript. More skills to come!

## PROJECTS

Projects to come!
